

SAHOMA
TECHNOLOGIES GROUP

◆ CAPABILITY OVERVIEW

Group Capability Overview

Industrial-technology holdings for Industry 4.0

◆ Who we are

We hold the companies running the plant floor.

Sahoma Technologies Group is an industrial-technology holding company. We acquire, found, and grow operational-technology businesses, and we hold them for the long term rather than flipping them on a fund clock.

Our companies build the SCADA, control, and data systems that keep energy, manufacturing, and critical infrastructure running. They share one conviction: industrial systems should be open, vendor-neutral, and built on a unified namespace.

FOUNDED	2021
HEADQUARTERS	Zürich
FOCUS	Operational technology
OWNERSHIP	Dean & Dean Capital Group
EMPLOYEES	750+
REGIONS	6

◆ **Patient capital**

We hold for the long term and build for the next decade of plant infrastructure.

◆ **Operating expertise**

More than two hundred years of combined plant-floor experience across the leadership team.

◆ **Open architecture**

Unified namespace, MQTT and Sparkplug B, and data ownership are non-negotiable.

◆ **Global reach**

A Swiss base serving energy, manufacturing, and critical-infrastructure operators worldwide.

◆ Portfolio and reach

What we hold, where we invest.

◆ **Sahoma Controlware**

Open-architecture industrial software and systems integration. SCADA modernization, MQTT and Sparkplug B, and unified namespace.

◆ **Founding companies**

We found and incubate new operational-technology companies around open architecture.

◆ **Selective acquisitions**

We acquire proven industrial-technology businesses and hold them for the long term.

◆ GLOBAL FOOTPRINT

United States, Europe, Middle East, Africa, Asia, and Australia. Six regions and more than forty countries, with regional headquarters anchoring delivery.
