

SAHOMA
TECHNOLOGIES GROUP

◆ PARTNERSHIP BRIEF

Partnership and Investor Brief

For founders, operators, and co-investors

◆ How we engage

A partner that has run the plant floor.

Sahoma Technologies Group acquires, founds, and grows operational-technology businesses. We take an operator's time horizon, backed by Dean & Dean Capital Group, so our companies build without a fund's exit clock.

◆ WHAT WE BRING

◆ **Patient capital**

Long-term ownership, not a flip.

◆ **Operating expertise**

More than two hundred years of combined plant-floor experience.

◆ **Open architecture**

Vendor-neutral conviction and data ownership.

◆ **Global reach**

Delivery across six regions and more than forty countries.

◆ WHAT WE LOOK FOR

Industrial and operational-technology businesses with a defensible position, open architecture, and a team that wants an operator as a partner rather than an absentee owner.
