

VEDAX
DATAOPS

◆ PORTFOLIO FACT SHEET

Capability Fact Sheet

Industrial DataOps and pipeline orchestration

◆ Capabilities

What we do.

Vedax is the DataOps platform for industrial enterprises, orchestrating data pipelines from the edge to the warehouse so teams can trust, move, and use plant-floor data at scale.

CATEGORY	HEADQUARTERS	SAHOMA STAKE	VALUATION
DataOps	Singapore, SG	Majority	\$1.4B

◆ **Pipeline orchestration**

Build, schedule, and monitor pipelines across the enterprise.

◆ **Data quality**

Validation, lineage, and observability in every pipeline.

◆ **Governance**

Access, cataloging, and policy across data products.

◆ **Industrial connectors**

Pre-built connectors to historians, brokers, SCADA, and ERP.

◆ **Transformation**

Code and low-code transforms from raw tags to modeled data.

◆ **Scale**

Streaming and batch at enterprise volume, with cost control.

◆ **MARKETS**

Energy, manufacturing, and utilities running large, distributed industrial data estates.
