

VEYLAN AI
INDUSTRIAL AI

◆ PORTFOLIO FACT SHEET

Capability Fact Sheet

Industrial AI for prediction and optimization

◆ Capabilities

What we do.

Veylan AI brings machine learning to the plant floor, turning industrial data into prediction, vision, and optimization that operators can act on.

CATEGORY	HEADQUARTERS	SAHOMA STAKE	VALUATION
Industrial AI	Bengaluru, IN	Majority	\$2.1B

◆ **Predictive models**

Forecast failures, quality, and process drift before they cost.

◆ **Process optimization**

Recommend setpoints and actions that improve yield.

◆ **MLOps**

Train, deploy, and monitor models with governance.

◆ **Machine vision**

Defect detection, safety, and inspection at line speed.

◆ **Edge inference**

Run models on constrained hardware near the process.

◆ **Domain templates**

Pre-built models for common industrial use cases.

◆ **MARKETS**

Manufacturing, energy, and process industries seeking measurable AI outcomes.
